

GRADALL®

Industrial Maintenance

**High performance machines
for metal mill maintenance**

VERSATILITY
EFFICIENCY
CONTROL
POWER

Metal mill maintenance is dirty, hot, rugged work in extreme environments. It demands a durable machine that can handle challenging conditions and get the job done efficiently. Gradall industrial maintenance machines are engineered and manufactured with this environment in mind. The machines' boom range, swing and 360-degree rotational movement allow for precise control in confined or crowded work areas.

Gradall industrial maintenance machines have the strength and power to withstand the vigorous pounding and vibration found in the metal, steel, and aluminum mill industries. Gradall's unique hydraulically integrated load-sensing system automatically adjusts for any job, big or small, without the need to select working modes. From ground level to boom end, Gradall's industrial maintenance machines are built and tested for tough, efficient work.

Auxiliary hydraulics line is fully protected, assuring a long life in rugged industrial applications.

THE GRADALL BOOM. IN A CLASS BY ITSELF.

Gradall's innovative boom design provides exceptional reach and movement. With continuous 360-degree boom tilt, these machines can work in hard-to-reach places, telescoping into position with minimal overhead clearance. Attachments—hammers, rippers, buckets and drills—can be precisely directed to the job at hand, whether skulling and cleaning hot metal ladles, removing bricks, cleaning distribution channels, or placing tap holes. Heavy-duty boom rollers reinforce optimum strength for the exceptionally rugged boom, and the boom tilt motor is at the rear of the cradle protecting it from damage.

ALUMINUM SMELTING

Aluminum Furnace Dross Skimming

- » Handle pot cleaning and furnace teardowns
- » Reach through the mouth of a furnace for dross removal and cleaning

WHEELED UNDERCARRIAGES

EXTRA MOBILITY TO HANDLE MANY JOBS IN BUSY METAL MILLS

- » Heat-resistant foam-filled or solid tires
- » Easy maneuverability
- » Heat-resistant shields protect tires
- » Can be hoisted using single-point yoke
- » Work in any direction without outriggers
- » Up to 18 mph travel speed

XL 3310 V

- » 42,294 lb (19,184 kg)
- » 28' 2" (8.6 m) reach
- » 19' 2" (5.6 m) dig depth

XL 4310 V

- » 46,580 lb (21,128 kg)
- » 31' 3" (9.5 m) reach
- » 22' 1" (6.7 m) dig depth

XL 5310 V

- » 55,926 lb (25,368 kg)
- » 34' 9" (10.6 m) reach
- » 25' 5" (7.7 m) dig depth

XL 7310 V

- » 77,500 lb (35,153 kg)
- » 47' 10" (14.6 m) reach
- » 6' 2" (1.9 m) max dig depth

Ground Clearance	11" (275 mm)	11" (275 mm)	11" (275 mm)	1' 4" (0.4 m)

Metric units are meters (m) unless noted. * Optional TAD571 VE Tier 4F

LADLE MAINTENANCE

Ladle Maintenance

- » Clean the bottom and side walls in hot condition
- » Debrick the wear lining, while not damaging the permanent lining
- » Rake and remove slag from hot metal, with a minimum loss of metal
- » Push out and remove plug at the base of ladle

BOF MAINTENANCE

BOF Furnace Maintenance

- » Effectively descull the converter lip
- » Clean and replace tap holes
- » Clean, debrick, repair and drill tap holes in converters

Tap Hole Cleanout and Replacement

- » Hydraulic tap hole drill attachment can drill out a tap hole in five minutes
- » New tap hole insert tool reduces overall tap hole replacement time

CRAWLER UNDERCARRIAGES
A STABLE WORK PLATFORM ON ANY SURFACE

- » Excellent maneuverability and traction
- » Track resistant to hot metal
- » New thicker grouser pads for side loading
- » Can be hoisted using single-point yoke

TORPEDO LADLE

Hot Metal Transfer Car Cleanout

- » Maintain hot metal troughs by removing hard slag
- » Clean out refractory brick
- » Topedo car cleanup

ELECTRIC FURNACES

Electric Arc Furnace Lining Removal

- » Clean and replace tap holes
- » Debrick and remove refractory lining materials
- » Rake and remove hot slag from pit below the furnace

OPTIONS

- » 23.6" (600 mm) track pads, triple grouser or flat, for XL 4210 V and XL 5210 V
- » 19.7" (500 mm) track pads, triple grouser or flat, for XL 3210 V
- » Auxiliary hosing and piping for pneumatic or hydraulic hammers
- » Single-point lifting yoke
- » Extended reach boom
- » Fire resistant hydraulic fluid
- » Work lights
- » Warning beacon
- » Attachment adapter to accommodate standard XL Series ditching buckets
- » Radio remote control with umbilical cord

ATTACHMENTS

Hydraulic Hammers

Pneumatic Hammers

Tap Hole Drill

Double Tooth Steel Mill Ripper

Single Tooth Steel Mill Rippers

Core Drill

Excavating Buckets:
28", 36" and 48"

A COMFORTABLE, PROTECTIVE WORKING ENVIRONMENT

Gradall XL Series V feature spacious cabs designed for operator comfort and safety, with plenty of windows for excellent visibility in all directions. Gradall, Deere or SAE boom control joysticks are built into the adjustable seat, enhancing operator efficiency, and convenient foot pedals allow the operator exacting control to position the carrier. For operator comfort, heaters, air conditioning and more are all standard.
